

FloWash™

Portable Filtration for Water- Based Fire Suppression Systems

*Keep rust, pipe scale and corrosive materials
from being discharged into storm drains*

- Compact, self contained, easy to operate
- Lightweight and mobile for quick response
- Quick connects in place for easy set-up
- Microbial filter kit traps 10 micron particles at efficiencies greater than 99%
- Inlet pressure gauge for conducting inspector and main drain test from unit
- Flowline II™ housing with “no tools required” cover design
- Butterfly valve to control flow into reservoir
- Splash Guard safety cover protects operator from unexpected pressurized spray and discharge

The patent pending FloWash™ system includes a 15 gallon translucent reservoir for atmospheric fire sprinkler system inspection test and main drain test. Users can maintain NFPA 25 compliance. For fire department connection backflush or sprinkler system flushing, the reservoir is bypassed for direct inline filtration.

EATON

Powering Business Worldwide

FloWash Specifications

Dimensions: Approximately 32"W x 36"D x 44"H

Weight: Approximately 175 lbs

Power: 12 VAC single phase at 15 Amps

FloWash Accessories

Quick connect for inspector test (included)

FDC connection valve retainer and connection adapter (included)

FloWash shown with fire hose (optional)

FLOWLINE II Filter Vessel

- High performance rated at 150psi at 250°F
- Unique one-piece body design
- Internal body to basket seal to prevent bypass
- Cover design provides safe and reliable "no tools required" access for bag replacement
- Displacement style cover prevents spills when opening the cover

Microbial Filter Kit

- High tech multi-stage filtration system specifically designed for high efficiencies, compact size, and easy change outs
- Helps reduce microbial agents and hydrocarbons

SPLASH GUARD for added safety

- Helps protect operators from unexpected pressurized spray and discharge
